HERMES 2026

COMPANY INFORMATION

HERMES is a professional automotive electronics company rooted in Hong Kong, China, dedicated to developing smarter, more reliable in-car technology solutions for the global market.

With years of experience in automotive electronics design, product engineering, manufacturing, and supply chain management, we specialize in creating innovative vehicle display systems, smart connectivity solutions, and intelligent in-car experiences that enhance safety, convenience, and driving enjoyment.

Headquartered in Hong Kong—an international hub connecting advanced manufacturing, technology innovation, and global commerce—HERMES combines deep industry expertise with global market insights to better understand the evolving needs of modern drivers.

We work closely with experienced manufacturing partners and engineering teams to ensure every product meets high standards in performance, stability, and durability. From product concept and industrial design to software optimization and mass production, we focus on delivering automotive electronics that are not only feature-rich, but also thoughtfully designed for real driving environments.

As vehicle intelligence and connectivity continue to evolve, HERMES remains committed to pushing the boundaries of automotive innovation—creating products that make driving smarter, safer, and more intuitive for users around the world.

Why Choose HERMES

Automotive-Grade Expertise
Years of experience in automotive electronics, focused on stable, reliable, and driver-focused technology.

Designed for Real Driving
We prioritize real user experience with smarter interaction, intuitive UI, and products built specifically for driving environments.

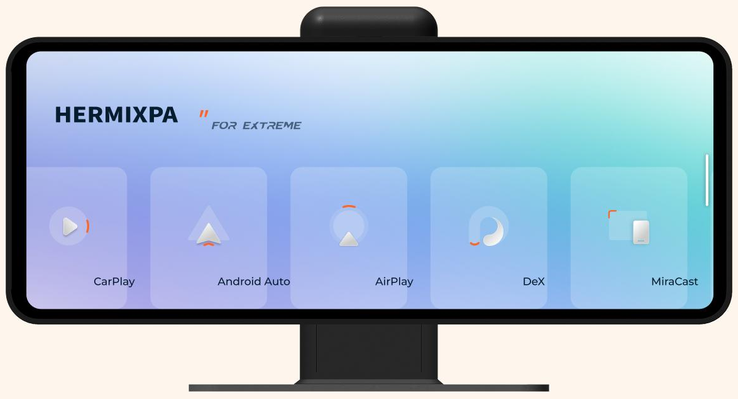

From Design to Mass Production
Strong capabilities in product design, engineering, manufacturing, and quality control to ensure dependable global delivery.
